

COTECOGL welding cooperative

This cooperative was supported by Rwanda Aid through income generating activities and welding start up materials.

They are welding different things like stoves, doors, etc in the area of Kamembe and Gihundwe Sectors.

Based on good and trusted collaboration they have with Gihundwe SACCO (Microfinance institution) they were given a loan of one million to strengthen their welding project.

They are creating a store that enable them to find materials they need in cheaper and easy way.

Farming and livestock training for the Rwandan Community

After organic and livestock training sessions to twenty farmers from Kerengra sector, in Nyasheke district, they were given aluminium sheets and animals.

Before giving animals to the farmer the consultation and basic treatments were done to ensure that they are given health and safe animals.

Rusizi mentoring scheme

The Rusizi Mentors have made a good start to the term. Most of them are mentoring up to 4 teachers in their schools.

They give them support in the planning, preparation of learner-centred lessons and offering advice based on lesson observations.

The posters and resources that were introduced during training at Easter are being used to good effect and it is encouraging to see both teachers and pupils having fun in their lessons.
